

Tracy Lube

DIRECTOR, OPERATIONS

tlube@thinkempirical.com

Tracy brings a laser-focused approach to maximizing operational efficiency, minimizing costs, and driving sustained growth for organizations.

With extensive experience consulting in the manufacturing sector across various industries—including chemical plants, oil companies, and food and beverage enterprises—she excels at process improvement, improving safety protocols, risk mitigation and management, and quality control. Utilizing Six Sigma methodologies and principles, Tracy has a proven track record of turning obstacles into opportunities by combining a diversified, disciplined approach to business process optimization with a commitment to achieving measurable results.

EXTENSIVE EXPERTISE IN:

End-to-End Business Operations
Global Logistics Management
Continuous Process Improvement
Team Leadership and Strategic Execution
Data Analytics

Throughout her career, Tracy has built a robust foundation in operations management across diverse industries and established a reputation for driving operational excellence and delivering substantial cost savings and increased revenue. Her experience spans both domestic and international operations, including Fortune 100 and 500 companies.

Tracy's background includes a unique blend of corporate, military, and educational experience. She served as a Flight Leader in the Air National Guard and managed supply chain, aircraft inspections, global logistics management, and P&L responsibilities. Tracy holds a bachelor's degree in business from

Thomas Edison State University and an associate's degree in aerospace maintenance engineering from the College of the Air Force. She also earned a Six Sigma Master Black Belt Certification from Villanova University.
